

# MARKET-PLACE Builder HACKATHON

## Overview:

Here some problems that I have faced while building a website: my website can be a daunting task, Errors and bugs can leave you aghast. From designing to coding, it's a complex ride, Compatibility issues can make you want to hide. Server crashes, slow load times, and more, Can make your website-building journey a chore...

**Error that I have faced; and solve by myself ...**

## Errors Summry:

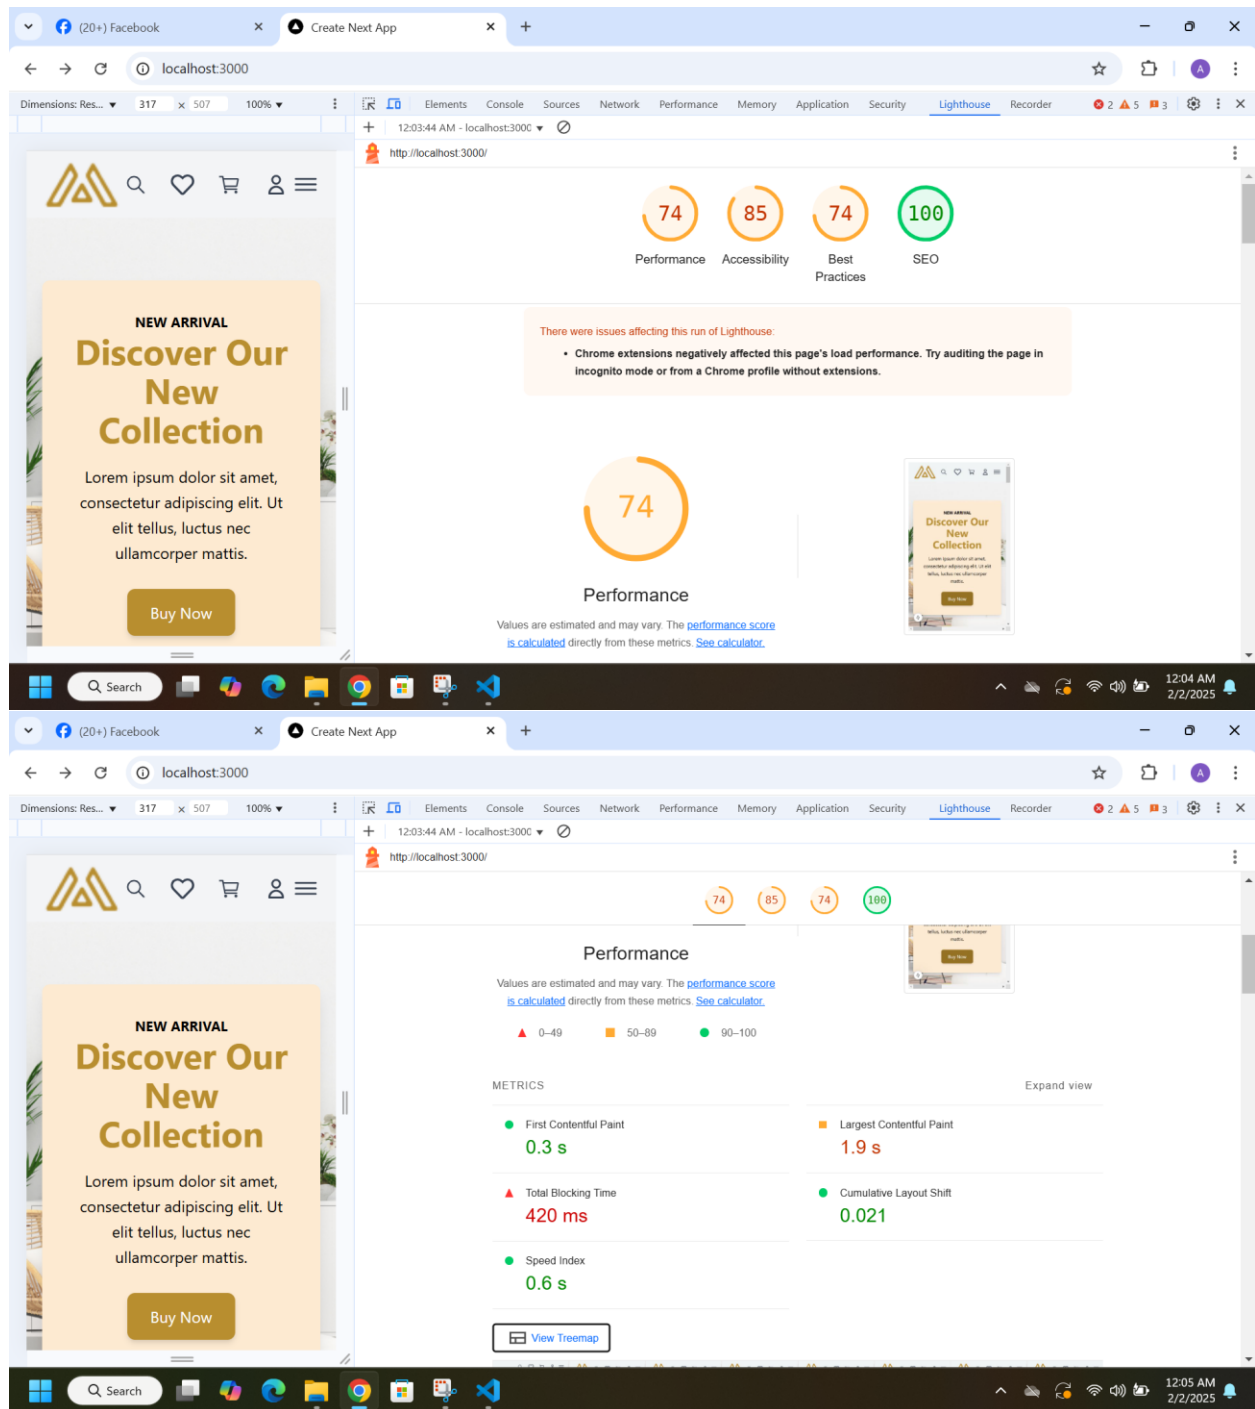

In my recent experience, I encountered several errors that significantly impacted my workflow. These included:

- 1. Loading Error:** The application took too long to load, which caused delays in my tasks.
- 2. 404 Error:** This error indicated that the requested resource could not be found, suggesting possible issues with the URL or the resource being unavailable.
- 3. Sanity Error:** This type of error typically arises when the data or inputs provided do not meet the expected criteria, leading to failures in processing.
- 4. Compiler Error:** This error occurred during the compilation process, indicating issues in the code that needed to be resolved before it could run successfully.
- 5. Product Not Found:** This error suggested that the product I was searching for was not available in the database or inventory.
- 6. Product Not Fetch Properly:** This indicated that the application was unable to retrieve the necessary product information correctly.
- 7. Didn't Match Terminal Error:** This error suggested a mismatch in expected outputs or parameters, which disrupted the expected workflow. These errors highlight the importance of thorough testing and debugging in software development to ensure a smooth user experience.

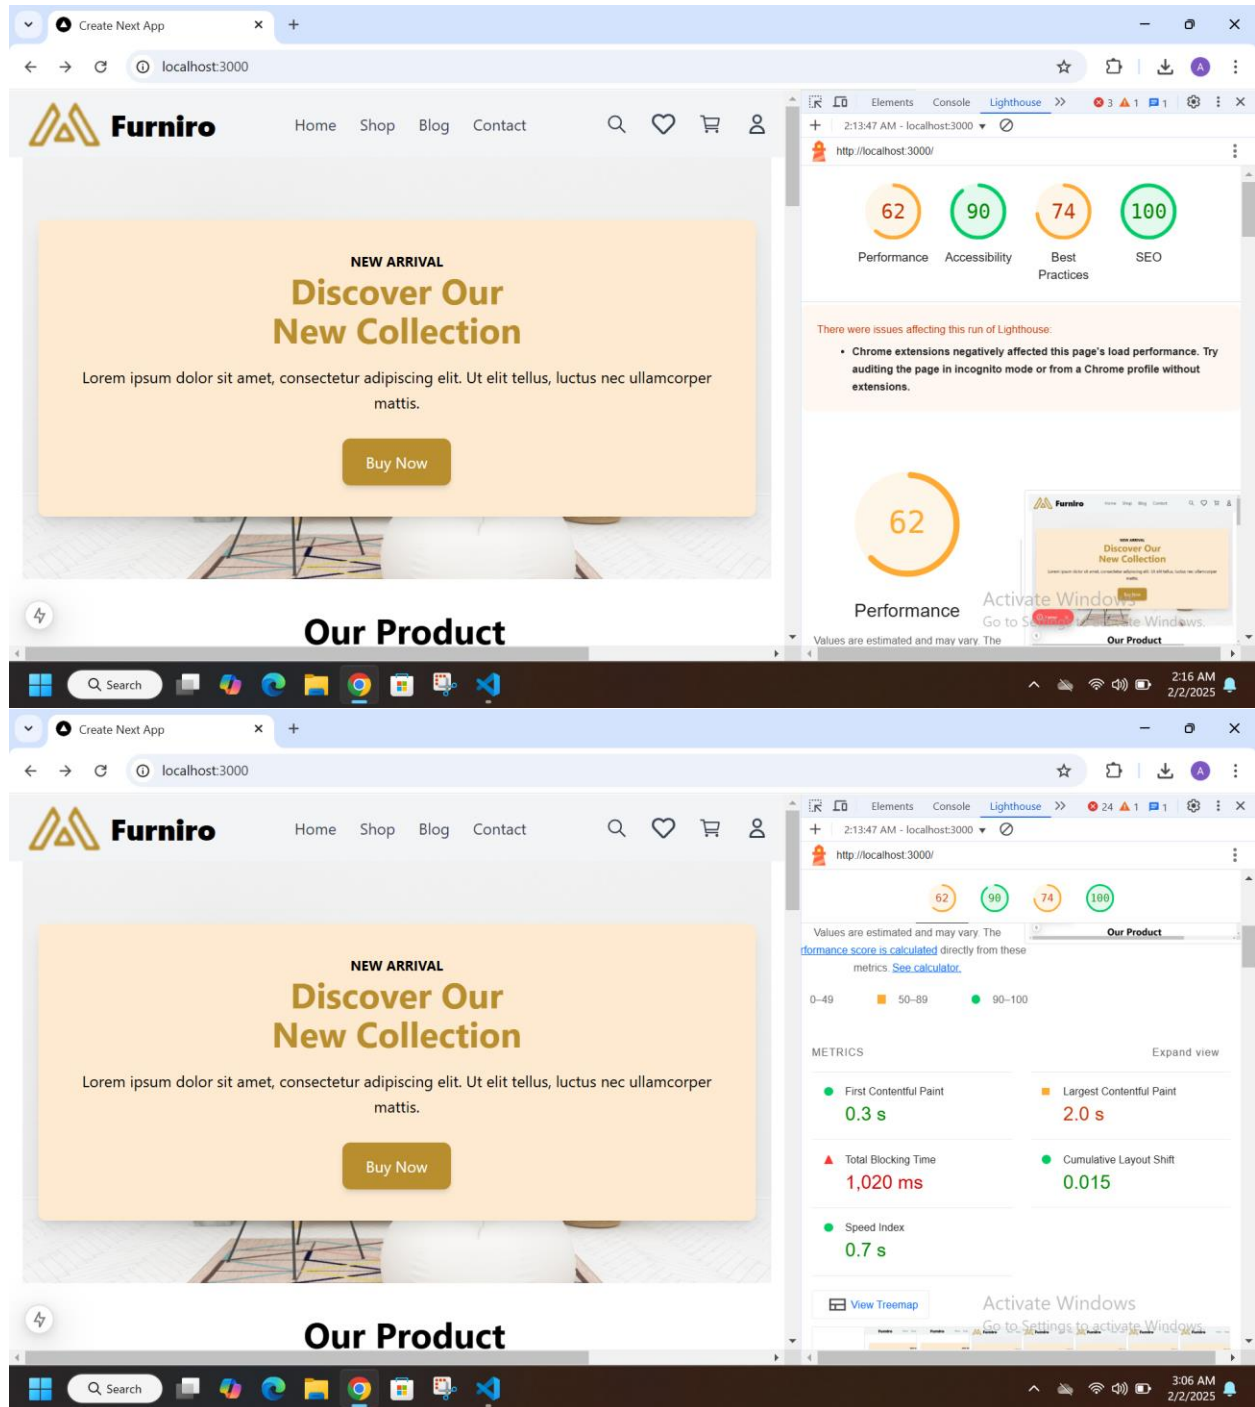

## CVS Test Case:

A	B	C	D	E	F	G	H	I	J	K
Test Case	Test Case	Test Steps	Expected Result	Actual Result	Status	Severity	Le Assigned	Remarks		
2	TC001	Validate product listing page	Open product page > Verify products	Products displayed correctly	Products displayed correctly	Passed	high	-	No issues found	
3	TC002	Test API error handling	Disconnect API > Refresh page	Show fallback UI with error message	Error message shown	Passed	Medium	-	Handled gracefully	
4	TC003	Check cart functionality	Add product to cart > Verify cart contents	Cart updates with added product	Cart updates as expected	Passed	High	-	Works as expected	
5	TC004	Ensure responsiveness on mobile	Resize browser window > Check layout	Layout adjusts properly to screen size	Responsive layout working as intended	Passed	high	-	Test successful	

# Lighthouse Testing performance: (in Mobile mode)

# Lighthouse Testing performance: (in Desktop mode)

# Developer Resources:

The screenshot shows a web browser window with the address bar set to 'localhost:3000'. The website has a navigation bar with a logo, search, heart, shopping cart, and user icons. The main content area features a 'NEW ARRIVAL' banner with the text 'Discover Our New Collection' and a 'Buy Now' button. The sidebar on the right is titled 'Developer Resources' and contains a table of resources.
